Tools needed to complete the necklace:

Wire cutters

Beading Techniques needed to complete the necklace:

Covering a Component

*For step-by-step photos and instructions on these and other techniques, visit FusionBeads.com and select *Beading Techniques* from the top navigation bar.*

Instructions to complete “Rings of Love” necklace:

Step 1

Using a 2-foot length of dead soft wire, cover one 41.5mm silver flat circle component with 45 3mm Siam crystal bicone beads (see Covering a Component Technique using the **alternative** beginning at Step 24).

Step 2

Using a 1.25-foot length of wire, cover one 35.1mm silver flat circle component with 38 3mm Ruby crystal bicone beads.

Step 3

Using a 1.25-foot length of wire, cover one 27.5mm silver flat circle component with 30 3mm Fuchsia crystal bicone beads.

Step 4

Place the Ruby bicone-covered component within the Siam bicone-covered component, and the Fuchsia bicone covered-component within the Ruby component. Slide one sterling silver donut bail up through the center of the small covered component and around all three components. Gently squeeze the bail together so that the loops on the bail line up.

Step 5

Place one end of the sterling silver omega chain through the aligned loops on the sterling silver bail.
