Opening and Closing a Jump Ring
Wire Wrapped Link
Gluing Swarovski Elements Crystal Rivoli Stones into a Rivoli Component

For step-by-step photos and instructions on these and other techniques, visit FusionBeads.com and select Beading Techniques from the top navigation bar.

Instructions to complete "Jeweled Beauty" bracelet:

Step 1

Following the directions on the package, mix the 5 Minute Epoxy.

Step 2

Place a drop of epoxy in the center of one Rivoli link. Place one 12mm Amethyst crystal Rivoli stone onto the epoxy, and press firmly (see Gluing Swarovski Elements Crystal Rivoli Stones into a Rivoli Component Technique). Allow to dry.

Step 3

Repeat Step 2 with the remaining Rivoli links and Rivoli stones.

Step 4

Using a 3-inch length of wire, make a wire wrapped link (see Wire Wrapped Link Technique) with one 8mm Fuchsia crystal round bead. Connect one side of this wire wrapped link to one loop on one Amethyst Rivoli stone link, and connect the other side of the wrapped link to one loop on one Crystal Copper Rivoli stone link.

Step 5

In the same fashion as in the previous step, create and connect wire wrapped links to Rivoli stone links in the following sequence. Each item connects to the one listed directly before and directly after it:

- 1 - Amethyst round bead
- 1 - Fuchsia Rivoli stone link
- 1 - Amethyst round bead
- 1 - Crystal Copper Rivoli stone link
- 1 - Fuchsia round bead
- 1 - Amethyst Rivoli stone link

Step 6

Open two jump rings (see Opening and Closing a Jump Ring Technique). Use one jump ring to attach one side of the toggle clasp to the open loop on one side of the bracelet and the other jump ring to attach the other side of the clasp to the open loop on the other end of the bracelet. Close both jump rings.
