**SUPPLIES NEEDED Fusion Beads Codes:**

- 1 package Black Crystal Clay (CR0851)
- 2 pair 46mm Antique Brass Plated Base Metal Kidney Ear Wire (BM2897)
- 2 pieces 22x20mm Antique Silver Plated Pewter Mini Round Bezel Pendants (PE2375)
- 2 10mm Antique Copper Plated Pewter Urchin Bead Caps (BM3356)
- 2 pieces 6mm Antique Gold Plated Brass Flower Bead Caps (BM1106)
- 2 pieces 22 gauge Silver Plated Brass 2" Head Pins (BM2703)

**TOOLS NEEDED:**

- Beeswax Toothpick or Crystal Katana
- Wet wipes
- Toothpick or a headpin
- Cutters

### **TO ASSEMBLE THE PENDANTS:**

#### **STEP 1:** (Image 2)

Pinch off two equal pea-sized balls, one of Part A (the color) and another of Part B (the hardener) of the Black Crystal Clay. Knead the two equal-sized balls fully together until the clay is a consistent color and not marbled.

#### **STEP 2:** (Images 3-5)

Split the mixed Crystal Clay in half and roll into two round balls. Place each of the round Crystal Clay balls into the base of each the 10mm Antique Copper Plated Pewter Urchin Bead Caps. You will want to have the ball big enough to make contact with the base of the 22x20mm Antique Silver Plated Pewter Mini Round Bezel Pendants, but not so big that you have clay oozing out the sides (that's an official technical term for making a mess). Press the 10mm Antique Copper Plated Pewter Urchin Bead Caps into the base of the 22x20mm Antique Silver Plated Pewter Mini Round Bezel Pendants. Make sure to use your wet wipe and wipe away any excess Black Crystal Clay that could be on the side of the metal or on your fingers. The Black Crystal Clay will dry rock hard and is super hard to remove, so get in the practice of always keeping your work surface clean and tidy.

#### **STEP 3:** (Images 6-8)

Next you will need to cut two of the 22 gauge Silver Plated Brass 2" Head Pins. Using a pair of cutting pliers, trim away all but 3/8" of the head pin, leaving the flat head intact. Thread onto the cut Head Pin a 6mm Antique Gold Plated Brass Flower Bead Cap. Press the Head Pin and Flower Bead Cap into the pendant from Step 2. If you did not have clay that oozed through the top hole of the Urchin Bead Cap, you may want to add a small dot of Black Crystal Clay prior to pressing in the Head Pin and Flower Bead Cap. Repeat to complete the pair. The Black Crystal Clay will harden within 2 hours and fully cure within 24.

### **TO ASSEMBLE THE EARRINGS:**

#### **STEP 1:** (Images 9-10)

Open one of the 46mm Antique Brass Plated Base Metal Kidney Ear Wire. Thread on the cured pendant. Repeat to complete the pair.

No kidding. It really is that easy to make these beauties! Did you have fun?
