Tools needed to complete the focal:

- Xuron Thread and Fiber Scissors (TL3000)
- Hypo Tube Cement (TL)

Beading Techniques needed to complete the focal:

Making a Tassel

Instructions to complete “Golem Tassel” focal:

Tip: Instructions will walk you through step-by-step on making a focal piece. Then let your creativity soar and add it to a beaded necklace, a pre-made chain, your favorite cord and more!

Note: Cut a 12-inch length of cord instead of a 2-inch length of cord in Step 5 of the Making a Tassel Technique.

Step 1

Using the pearl cotton and a standard business card (or 3 fingers), make a 2-inch long tassel (see Making a Tassel Technique). Wrap the cord around the card or fingers 50 times (20 feet) to create a fuller tassel.

Step 2

String one 8mm bead onto the 12-inch (6-inch doubled up strands) from Step 5 of the Making a Tassel Technique. Tie 4 knots after the bead to create one large knot.

Step 3

String the 23mm Golem bead. Tie 3 knots after the bead to create one large knot.

Step 4

String one 8mm bead.

Step 5

Bring the cord through the 6mm jump ring and string back down the 8mm bead from Step 4. Pull tight.

Step 6

To secure your cord, tie a knot around the large knot from Step 3, cut the cord, and apply Hypo Tube Cement to the back of your knots.
